PROJECT DESCRIPTION

I. GENERAL

This project involves the installation of a Hazard Identification Beacon and video detector along northbound MD 665 near its overpass of Riva Road in Anne Arundel County. MD 665 is assumed to run in a north-south direction.

II. OPERATION

- When the video camera detects a predetermined number of vehicles or speed on northbound MD 665, a signal shall be sent to the Hazard Identification Beacon to begin flashing "yellow". This is intended to warn northbound drivers that they are approaching a congested area.
- A full-traffic-actuated, eight-phase controller with video interface, detector rack and all necessary equipment housed in a size "G" pole-mounted cabinet shall be installed at this location.

III. SPECIAL NOTES

- The Contractor shall be responsible for terminating all signal cables to the appropriate terminals and shall properly label each cable.
- All controller cabinet wiring will be performed by the S.H.A. Signal Shop. Contact Mr. Ed Rodenhizer (410) 787-7650 seventy-two hours in advance of intended work.
- All underground and overhead utilities shown on these plans are schematic only and may not be complete. The Contractor shall be responsible for notifying Miss Utility prior to construction so that all utilities may be located in the field. If the Contractor perceives that a conflict between the utilities and the traffic signal will occur, the Contractor shall notify the Project Engineer immediately so that the conflict may be resolved.
- Contractor shall supply the anchor bolts and concrete foundation for the strain pole. Contractor shall be paid for these parts from the strain pole installation price item.
